Smok Mag User Guide and features

225W OUTPUT

The max output power of Mag is 225W, and there are three modes for you to choose from.

Temp Mode can enhance consistency and taste of every puff. Watt Mode is perfect for cloud chasing. Memory Mode can be your intelligent partner.

Smok Kit Content

Standard Edition

- 1 x Mag Mod
- 1 x TFV12 Prince Tank
- 1 x V12 Prince-Q4 0.4Ω Quadruple Coils (Pre-installed)
- 1 x V12 Prince-T10 0.12Ω Decuple Coils
- 1 x Replacement Glass Tube
- 1 x USB Cable
- 1 x User Manual
- 1x Screwdriver
- Spare Parts

Note: The screwdriver is used to tighten the flower-shaped button

Settings follow the same routine

- When you enter the settings menu (THREE CLICKS on the fire bar), you can quickly skip through the settings menus by clicking the fire bar.
- SMOK mods have FOUR main menus:
- Mode Setting – where you select your vaping mode (TC or wattage, for instance)
- Puff Counter – you can limit the number of puffs you take per day; this feature is set to NEVER as default
- Screen Setting – in here you can (on some mods) change the colour of the font as well as the light-up LEDS on mods like the ProCOLOR
- Power Off – this is where you turn the mod off
- Once you're inside a Menu sub-folder, to move around simply use the buttons that you use to adjust the temperature.
- To select a setting, hold down the fire key for ONE SECOND.

EXAMPLE: How To Change The Font Color On A SMOK Mod

- From the Homescreen, Click THREE times on the fire bar
- Click through the menus until you reach Screen Setting
- Use the buttons on the mod to move through the options until you find the color you want
- Once you have the color you want, hold the fire bar for ONE SECOND

This process works across the entirely of the operating system: ONE SECOND holds select options; quick clicks move you through the Settings Menu; the physical buttons are used to move through the Menu's sub-folders and options.

Locking your Mag

PATENTED LOCKING MECHANISM

The newly designed top cap has a patented locking mechanism, simply press this button then you can open the cap.
Besides, this design can effectively avoid accidently opening of top cap and leaking of e-juice.
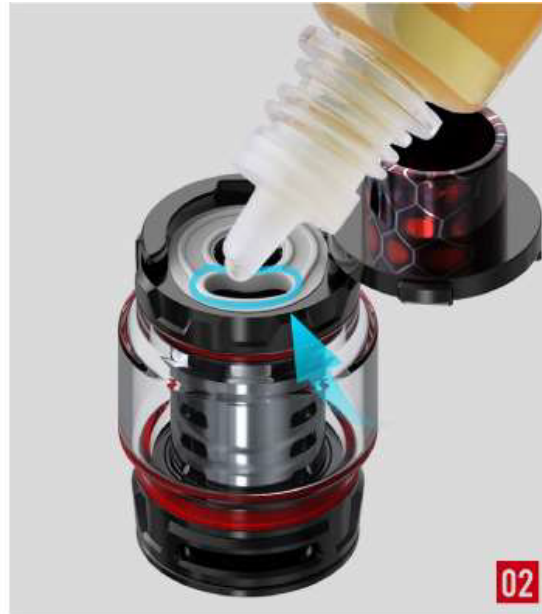

01

02

TOP REFILL SYSTEM

Top rotary refill makes filling a easy thing. Leak proof slot can significantly solve leaking problem.

Hold the tank with one of your hands, and use another one to press top cap and move it counterclockwise.

Add e-liquid through the slot, and pay attention not to drip it into the central airflow tube.

Close the cap carefully and firmly. Then let it stand for several minutes to get the organic cotton completely saturated.
