Specifications:

X-Priv Mod
Size: 88x46.5x30.4mm
Power Range: 1W-225W
Output Voltage:0.5V-9.0V
Resistance Range: 0.1Ω-2.5Ω (VW) / 0.05Ω-2Ω (TC)
Temperature Range: 200℉~600℉/100℃~315℃

Weight:172g
Standby Current: <500uA

TFV12 Prince
Material: Stainless Steel
Size: 28x63mm
Weight: 60g
Capacity: 8ml
Thread: 510

Verification

1. Using your Smartphone or PC visit the SMOK official website: http://www.smoktech.com/support/
2. Scratch off the coating of the security label on the package to reveal the 16 authentication code. Enter it into the input field on the webpage to verify. The result will be displayed after a few seconds.
3. If you have any questions, please contact SMOK via e-mail, phone or our website to get more help.
2

Warranty

Note: Please carefully keep the anti-counterfeiting codes on the package. Only the activated products can get after-sale service.

X-Priv Kit Warranty Period: 6 Months from the Purchase Date.

Within the 6 Months, some items may not be eligible for service due to misuse, damage, or other failures caused by end users. SMOK's warranty only covers manufacturer defects or premature failure. Please contact a SMOK Authorized Vendor for more information and terms of service.

The "X-Priv Kit Customer Card" is an important proof for customers to process warranty claims, please keep it. Read the card carefully and fill it out correctly. Warranty claims must be accompanied with this card. For more warranty policies and processes, please visit our official website: http://www.smoktech.com/support/

4

Preparation before use:

1) Please make sure the battery you're using corresponds with the BATTERY WARNING CARD.
2) Before vaping, please make sure the tank is filled with enough e-juice.

Battery Installation

1) Open the battery cover as the picture shows;
2) Place the batteries into the device according to the correct directions;
3) Close the battery cover.

5

Attach Atomizer

The X-Priv uses a spring loaded 510 connector. Please be certain that there is nothing between the Mod and the attached atomizer.
1) Connect the atomizer to the device and tighten it clockwise.
2) After the device is powered on, please press the Fire Key to vape.

Mod Operations

1. Power On:

While the device is off, quickly click Fire Key 5 times in 2s to turn it on. The screen successively displays "SMOK";

2. Vaping:

①While the device is on, hold Fire Key to vape (it will be forced to stop working when one vaping is longer than 10s, release and press again to vape again);
②Quickly press the Fire Key 5 times to lock or unlock.

3. Screen Unlocked Status:

1. Press Fire Key and DOWN button simultaneously to choose your desired
6

---

mode, TC Mode (Ti, Ni, SS), VW Mode and MEMORY Mode;
2. Press Fire Key and UP button to choose your desired ramp up option Norm/Soft/Hard in WATT MODE or 10-225W in TEMP MODE or MEM:1-23 in MEMORY MODE.
3. Press UP or DOWN Button to adjust the temperature or wattage settings.

4. Locking your device:

Hold the Fire Key for 5s this will lock your device. No adjustments can be made nor can the device be fired in this state.

5. Power Off:

While the device is locked, hold Fire Key for 5s, choose POWER OFF, and the screen turns off, which means the device is power off. You may also access the option to turn off your device by entering the menu and selecting the option there.

6. Settings Saved:

All the settings will be automatically saved when selected. No need to reset your preferences each time the device is turned on.

7. Menus & Prompts:

After startup, fast press the Fire Key 3 times in 2seconds, then you will go to the operation menu. At the same time long-press
7

---

on the Fire Key to confirm your selected function; UP/DOWN Button can navigate the menu.

1) VW Mode

Working power
Resistance value
Vape data
Working voltage
Puff time
8

- Enter VW Mode: select "WATT" from TC Mode, VW Mode and MEMORY Mode by pressing Fire Key + DOWN Button simultaneously while screen is unlocked. Alternatively you can switch the mode by depressing the fire key three times in quick succession, then press the fire key for a moment while the screen displays "MODE", and then select "WATT" by holding the fire key for a moment.
- In the WATT Mode, you can use UP / DOWN Button to adjust the wattage settings with an increase/decrease of 0.1W to get the best preferred wattage. (Note: When the wattage lower than 100 watts the mod will adjust in rentile of a watt initially ; higher than 100 watts the mod will adjust a watt every time).
- Use Fire Key to switch to next submenu "Preheat", and use UP or DOWN button to switch your desired ramp up option HARD, NORM, SOFT.
9

---

2) TC Mode

Working temperature
Resistance value
Vape data
Working voltage
Puff time

- TC Mode is available for X-Priv, only works with a TC type atomizer.
- Enter TC Mode: switch to TC Mode(Ti, Ni, SS), VW Mode and MEMORY Mode by pressing Fire Key+ DOWN Button simultaneously while screen is unlocked or by quickly pressing the fire button 3 times and selecting Mode, and then select TEMP.
10

- Use Fire Key + UP Button simultaneously to adjust from 10W to 225W.
- In TC Mode, use the UP / DOWN Button to adjust the temperature settings with an increase/decrease of 1 degree Fahrenheit (about 1 Celsius degree) to get the best preferred settings.

3) MEMORY Mode

Working power
Resistance value
Vape data
Working voltage
Puff time
11

- Enter MEMORY Mode: select from TC Mode, VW Mode and MEMORY Mode by pressing Fire Key + DOWN Button simultaneously while screen is unlocked.
- Wait 5s or press and hold the Fire Key to set M1-M23 settings; increase or decrease the wattage value by UP or DOWN button.

- Screen Time: 15-240S
- Auto Lock: Lock or Unlock

6) Power Off

Choose "X" means Power On;
Choose "√" means Power Off with "SMOK
13

Tank Operation

How to fill with e-liquid:

1) Hold the tank with one of your hands, and use another one to press button and then move the cap counterclockwise.

2)Add e-liquid through the slot, and pay attention not to drip it into the central airflow tube.
14

---

3) Close the cap carefully and firmly. Then let it stand for several minutes to get the organic cotton completely saturated.

Replace atomizer core:

First, unscrew the base, then unscrew the coil head from the base, then secure your new coil head onto the base plate (ensure that it is screwed in securely), finally screw the new coil head into the chimney and you're ready to prime your new coil head.
15

Control air input:

Rotate the bottom adjustable airflow system to control air input.

Adjustable Airflow Ring

If you need any additional information or have any questions about the products or its use, please contact your local SMOK agent or to visit our website www.smoktech.com
16

Attentions

1. Before using please read the manual carefully.
2. Connect the atomizer to a power source that is suitable for its intended use.
3. Please avoid getting the e-liquid into your mouth directly.
4. Please do not store liquid inside the tank if it is not going to be used for a long period.
5. Please refill the tank when the e-liquid is nearly used out to avoid dry-burning of the atomizer.
6. Please do not drop, throw or mishandle this product as the outer shell or inner components may be damaged.
7. In order to prolong the operation of your product, please keep it away from excessive temperature and humid environment.
8. Please keep this product away from children and pregnant women.
