How to use this product:

While the device is on, press the Fire Key to vape (it will be forced to stop working when

screen displays the product logo "RIGEL" and the version informati

vaping time is longer than 8 seconds, release and press again to vape again); Quickly press the Fire Key 3 times to lock or unlock the vaping function. Screen Unlocked Status: 1) Press UP or DOWN Button to choose your desired wattage; 2) Press UP and DOWN Button simultaneously to lock or unlock the wattage adjustment

While the device is off, fast press the Fire Key 5 times in 2 seconds to turn it on. The

- Press the Fire Key and DOWN Button to clear the number of puffs; 4) Press the Fire key and UP Button simultaneously to switch the theme color. . Charging : When the USB cable is inserted, the charging interface will appear and display the battery
- While the device is on, fast press the Fire Key 5 times in 2 seconds to turn it off. Before Vaping
- Fill the pod completely with e-liquid Take 2-3 puffs while the power is off and without pressing the Fire Key
- The eliquid is sucked through the SMOK product into the mouth, immediately wash your mouth out completely, seek medical assistance if needed, then remove the atomizer and clean the spillage before vaping again.

Instructions on how to fill this product with e-liquid Before the e-liquid in a SMOK product runs out, add e-liquid into the pod. This should be done before the e-liquid runs out to avoid burning the coil. For instructions on refilling the SMOK product with e-liquid, users should refer to these

- Instructions below, and the instructions for bottles containing e-liquid.
 Users should first ensure that the nozzle attached to an e-liquid bottle can easily connect
 and slot into the SMOK pod. The nozzle attached to an e-liquid bottle must be smaller
 in diameter than the opening (filling slot) in the SMOK pod. The opening (filling slot) of the
 SMOK product is below. The nozzle of an e-liquid bottle must be smaller than the
- diameter measurements below.

English / 04

Size of the filling slot of the pod

Filling Instructions

attached nozzle no less than 9mm long when

refilling e-liquid

- slot into the SMOK pod. The nozzle attached to an e-liquid refill container must be narrower, and smaller in diameter, than the opening in the SMOK pod.

 Carefully connect the nozzle attached to an e-liquid refill container, into the opening (i.e.
 filling slot) of the SMOK pod.

 Ensure that the nozzle of the e-liquid refill container is fully inserted into the filling slot of
- the SMOK pod, and that there is no release of e-liquid until the nozzle is fully inserted into the filling slot by refraining from touching the release mechanism of the e-liquid refill

Store in a dark and well-ventilated place below 30 C.

Do not store for long periods containing an e-liquid. If the product is not going to be used for a 2-3 days period: remove the pod and pour out the inside e-liquid to avoid e-liquid

Once the nozzle is fully and securely inserted, and the docking system is therefore fully connected, release e-liquid from the e-liquid refill container (see instructions for the e-liquid refill container). Release of e-liquid from the e-liquid refill container should be slow, careful and monitored by users to ensure absolutely no spillage is possible.

container (see instructions for the container containing e-liquid) until the nozzle is fully
